

## CHALK RIVER WATER SYSTEM USERS

### VOLUNTEERS NEEDED

In order to comply with provincial regulations and as part of the ongoing efforts to ensure the safety of drinking water, the municipality must test the drinking water supply for the presence of lead.

The Town of Laurentian Hills is looking for 10 Residential Home Owners and 1 Business who are connected to the Chalk River Water System to participate in the testing and permit staff from the Water Treatment Plant to take water samples for lead testing. The testing will be performed twice a year and each test will take approximately 45 minutes. Testing periods are once between June 15 to October 15, 2016 and once between December 15, 2016 to April 15 2017.

All volunteers will be given ample notice prior to any testing and will be provided of copies of the test results.

If you are willing to participate and allow the Town to sample water please contact the Town office at **613-584-3114**
