

## No Hot Pets

- Hundreds of reports are received every summer in Ontario of pets being left in cars.

Dogs have a limited ability to sweat; even a short time in a hot environment can be life-threatening. A dog's normal body temperature is about 39°C and a temperature of 41°C can be withstood only for a very short time before irreparable brain damage or even death can occur.

- Will you pledge not to leave your pets in your vehicles this summer? Visit [www.nohotpets.ca](http://www.nohotpets.ca) to take the pledge now (and receive your free window decal while supplies last) and help make this the summer of No Hot Pets!

**If you observe an animal suffering in the heat,  
call the 24/7 hotline, 310-SPCA (7722)**
