

VOLUNTEERS NEEDED
Chalk River Water System Users

In order to comply with provincial regulations and as part of the ongoing efforts to ensure the safety of drinking water, the municipality must test the drinking water supply for the presence of lead.

The Town of Laurentian Hills is looking for 1 Business and 9 Residential Home Owners who are connected to the Chalk River Water System to participate in the testing and permit staff from the Water Treatment Plant to take water samples for lead testing.

The testing will be performed twice a year and each test will take approximately 45 minutes. Testing periods are once between December 15 to April 15, 2019 and once between June 15, 2019 to October 15, 2019.

Volunteers will be given ample notice prior to any testing and will be provided of copies of the test results.

If you are willing to participate and allow the Town to sample water please contact the Town office at **613-584-3114**.
