

North Renfrew EarlyON Child and Family Centre currently located within the St. Mary's school. We offer free high-quality programming for parents and caregivers with children ages birth-6 years old. All programming aims to foster a sense of belonging, well-being, engagement, and expression while meeting the following core services:

- Supporting early learning and development by offering programming to encourage children's learning through play, and to build positive child & adult relationships.
- Engaging parents and caregivers through information sharing about child development, parenting, play, and inquiry-based learning.
- Offering pre- and post-natal support.
- Connecting families to the community by responding to parents and caregivers inquiring about their child's development. This can include offering screening, making referrals to health professionals or other specialized community services.

Please follow us on Facebook to have our updated programming:
